2025 Meeting Dates

The Advisory Council is required to meet at least once per year. In 2024 we met in January, September, and December. I suggest we change up some dates here.

January wont be needed because we are meeting now and there wont be new information to share.

April would allow for Bay City's full monitoring results to come in for review and we can discuss 2025's L&C sampling before it begins in June.

The September meeting date provides the group the opportunity to review a majority of the lead sampling results.

December can be a last minute option should there be end of the year business to bring up.

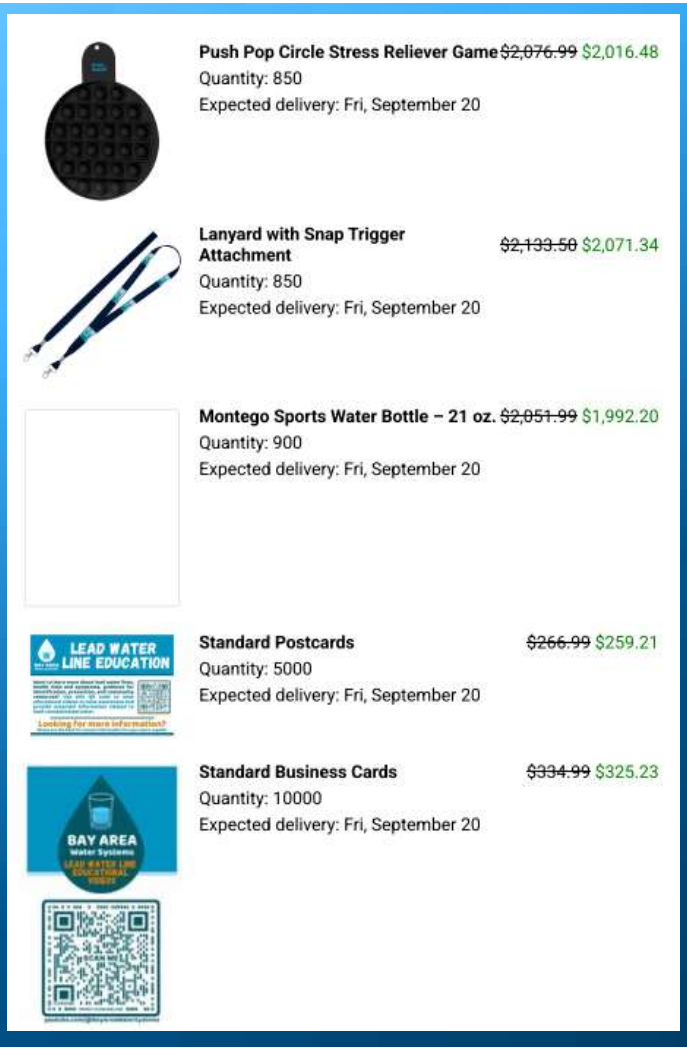

EGLE Mini Grants

Overview so far…

- The Grant was pursued in mid to late 2023
- Official start date for the grant 10/1/2023 for $14k
- Proposed end date of 8/31/2024
- Those funds went towards informational videos and physical materials to be distributed →
- Multiple meetings were held to discus script and formatting
- On August 2nd the videographer came out to capture video
- On October 21st rough drafts of the videos were sent out →
  - Videos were reviewed and comments were made
- Late September physical materials arrived
- No final copy of the videos has been released.

What now?

- How do we distribute the physical materials?
- What to do about the videos?

Lead and Copper Rule Improvements

Lead and Copper Rule Improvements:

- LCRI is the latest Lead and Copper Rule
  - LCR-91, LCRR-21, EGLE LCRR-21
- Official Published on 10/8/2024
- 5 Key Provisions:
  - 100% Lead Removal in 10 Years
  - Locating Legacy Lead Pipes
  - Improving Tap Sampling*
  - Lowering Lead Action Level – 15-12*-10
  - Strengthen Protections
- 3 years before active, EGLE to weigh in…

Service Materials

Included in our Consumer Confidence Reports (CCR) is a data table that provides service line details for multiple communities.

← Data Table From 2023 CCR updated in March 2024

With CDSMI due on 10/16 we should have more accurate numbers.

I reached out for updated numbers from communities with lead and didn't get a lot of response

This table will be fully updated for 2024s CCR and we can review where we sit in April's meeting
